

Speed-up with and without the skills packet, aggregated per kernel

skills off skills on

qwen38 oss120b kimi27sglang

Bars: geomean over kernels of each kernel's BEST timed speed-up. Tick: the same geomean over each kernel's MEDIAN. n = kernels behind the bar. Paired groups are restricted to the kernels BOTH arms timed; an UNPAIRED group shares none, so its two bars measure different kernel sets and are not a comparison, and a paired group at n<3 shared kernels is annotated but is not one either. 3 arms have no skills counterpart and are omitted: kimi27sglang C w2, kimi27sglang Fortran w8, kimi27sglang Fortran w9.
